Home Theater Systems

Change your ordinary family rooming into a Home Theater that can actually outperform the average movie theater. Complete with theater seating and lighting control, experience mind blowing entertainment in your own home! Theaters are in demand and more popular than ever!

Home Automation

Smart Homes are the way of the future! Provide overall safety for your home and loved ones. So many options to choose from! Easily put, a Smart Home allows you to program *your* home to alert you if you left a stove burner, or a light on, or if a door is open. These settings/alerts can be made in home, from your cell phone or your computer! This is a wonderful way to prolong independent living as we age, and especially for those physically challenged.

Whole House Audio/Video Systems

Multiple rooms, even outdoors, can be made to provide different modes of entertainment at the same time using a Whole House Audio/Video System. Example: a bedroom may be providing easy listening, while the kitchen and dining room provide jazz music. A movie plays in the DVD player in the living room while outside on the patio the kids are listening to satellite radio. ALL controlled from one central location by a wall mounted keypad. Even an intercom can be easily integrated into the system.

Customer Service

From start to finish, from dream to reality, Fidelity Logic is focused on *you*, the customer. Compare our prices to "box stores"! You will be pleasantly surprised! No project too big or too small!

FREE DELIVERY • FREE BASIC SETUP • FREE CLEAN UP
